No. 1

Environmental Sciences

C. E. Amundsen, J. E. Hanssen, J. P. Rambaek, A. Semb, E. Steinnes (Dragvoll, Lillestrøm and Kjeller, Norway)
Long-range transport of trace elements to Southern Norway studied by INAA of air filters 5

J. Caplan, E. Løbersli, R. Naeumann, E. Steinnes (Dragvoll, Norway)
A neutron activation study of trace element contents in plants growing on soils of different acidity 13

V. Cercasov, H. Schreiber (Stuttgart, FRG)
Foliar contamination and uptake from aerial sources investigated by INAA and XRFA 21

I. Drabaek, P. Eichner, L. Rasmussen (Copenhagen and Vedbaek, Denmark)
Concentrations of rare earth elements in sediments, mussels and fish from a Danish marine environment, Lillebaelt 29

B. Griepink (Brussels, Belgium)
Recent certification of reference materials by the Community Bureau of Reference for, in particular, environmental analysis 39

A. P. Grimanis, N. Kalogeropoulos, M. Vassilaki-Grimani, M. Angelidis, D. Zafiropoulos (Athens, Greece)
Determination of rare earth elements in sediment cores from Northern Saronikos Gulf, Greece, by instrumental neutron activation analysis 45

R. Niedergesäss, B. Racky, C. Schnier (Geesthacht, FRG)
Instrumental neutron activation analysis of Elbe river suspended particulate matter separated according to the settling velocities 57

O. Njåstad, R. Naeumann, E. Steinnes (Dragvoll, Norway)
Variations in atmospheric trace element deposition studied by INAA of peat cores from ombrotrophic bogs 69

Y. Oh'a, A. Nakano, M. Matsumoto, M. Hoshi (Ibaraki, Japan)
Comparison of selenium content in human hair from different individuals in different countries, by $^{76}Se(n,\gamma)^{77m}Se$ reaction 75

M. Singh, A. D. Sawant (Bombay, India)
Neutron activation and radiochemical separation of selenium from environmental and food samples from and around Bombay using ethyl–α–isonitrosoaceto-acetate 83

Sun Jingxin, R. E. Jervis (Beijing, China and Toronto, Canada)
Concentrations and distributions of trace and minor elements in Chinese and Canadian coals and ashes 89

J. Tölgyessy, Ľ. Olah, E. H. Klehr (Bratislava, Czechoslovakia)
Contribution to the radioanalytical determination of heavy metals in the working environment of welders 101

M. T. Ganzerli Valentini, R. Stella, L. Maggi, G. Ciceri (Pavia and Milano, Italy)
Copper hexacyanoferrate(II) and (III) as trace cesium adsorbers from natural waters 105

N. I. Ward, S. A. Kerr, T. Otsuka (Guildford, Surrey, UK)
Multielement content of coal by neutron activation analysis techniques 113

N. I. Ward, N. M. Spyrou, A. A. Damyanova (Guildford, Surrey, UK and Sofia, Bulgaria)
Study of hair element content from an urban Bulgarian population using NAA assessment of environmental status 125

A. Wyttenbach, S. Bajo, L. Tobler (Würenlingen, Switzerland)
Aerosols deposited on spruce needles 137

L. Zikovsky, M. Badillo (Montreal, Quebec, Canada)
An indirect study of air pollution by neutron activation analysis of snow 147

In Vivo Analysis

D. M. Franklin, D. R. Chettle, M. C. Scott (Birmingham, England)
Studies relating to the accuracy of in vivo measurements of liver and kidney cadmium 155

A. Kacperek, C. J. Evans, J. Dutton, W. D. Morgan, A. Sivyer (Swansea, UK)
A system for the determination of silicon in the human lung using neutrons from a 2MV Van de Graaff generator 165

S. S. Krishnan, M. T. Bayley, A. J. W. Hitchman, S. C. Lin, K. G. McNeill, J. E. Harrison (Toronto, Ontario, Canada)
Small sample in-vivo neutron activation analysis using californium sources 173

L. Larsson, M. Alpsten, S. Mattsson (Göteborg, Sweden)
In vivo analysis for nitrogen using a ^{252}Cf source 181

L. Wielopolski, A. G. Meek, M. Moskowitz, S. H. Cohn (Upton and Suny, NY, USA)
(γ, n) activation of cancer patients 187

G. E. Nicolaou, N. M. Spyrou, Y. S. Khrbish (Guildford, Surrey, UK)
The importance of the geometrical factor in nuclear activation analysis 195

Definitions and Terms 203

No.2

Counting System

H. A. Das, J. Zonderhuis (Petten, The Netherlands)
Application of anti-Compton counting in instrumental neutron activation analysis 207

M. J. Koskelo (Meriden, CT, USA)
Count rate effects in analysis programs using fitting techniques 215

G. Meyer (Gif-sur-Yvette, France)
Multiparameter coincidence spectrometry applied to the instrumental activation analysis of rocks and minerals 223

G. W. Nelson (Tucson, Arizona, USA)
CINA – a program for complete instrumental neutron activation analysis with a PC-type minicomputer 231

H. K. Nielsen, J. O. Schmidt (Roskilde, Denmark)
Instrumental neutron activation analysis technique using subsecond radionuclides 237

S. Sterlinski, W. Hammer, M. Wasek (Warszawa and Otwock-Świerk, Poland)
The nature of dead time in multichannel pulse height analyzers at high counting rates and related problems 243

G. P. Westphal (Vienna, Austria)
Quantitative gamma spectrometry at high counting rates 257

Forensic Science

V. P. Guinn, S. R. Fier, C. L. Heye, T. H. Jourdan (Irvine, California, USA)
New studies in forensic neutron activation analysis 265

T. Kishi (Tokyo, Japan)
Forensic neutron activation analysis – the Japanese scene 275

Geochemistry

C. F. Chai, S. L. Ma, X. Y. Mao, K. N. Liao, W. C. Liu (Beijing, China)
On the methodology of radiochemical neutron activation analysis of noble metals 281

C. F. Chai, S. L. Ma, X. Y. Mao, Y. Q. Zhou, Y. Y. Sun, D. Y. Xu, Q. W. Zhang, Z. Z. Yang (Beijing, China)
Neutron activation studies of refractory siderophile element anomaly and other trace element patterns in boundary clay between Permian/Triassic, Changxin, China 293

V. Caramella Crespi, N. Genova, S. Meloni, M. Oddone (Pavia, Italy)
A rapid radiochemical procedure for uranium determination in natural waters 303

M. A. Gouveia, M. I. Prudéncio, M. C. Freitas, E. Martinho, J. M. P. Cabral (Sacavém, Portugal)
Interference from uranium fission products in the determination of rare earths, zirconium, and ruthenium by instrumental neutron activation analysis in rocks and minerals 309

G. Kennedy, K. Touhouche (Montréal, Québec, Canada)
Determination of erbium in silicate rocks at the 1 μg/g level 319

S. L. Ma, C. F. Chai, X. Y. Mao, H. C. Peng, K. Lu, X. Y. Xiao, Z. Y. Ouyang (Beijing and Guiyang, China)
Identification of the origin of silicate, magnetic and glass spherules from trace elemental abundances by INAA 329

M. Madaro, A. Moauro (Rome, Italy)
Trace element determination in rocks and sediments by neutron activation analysis 337

X. Y. Mao, C. F. Chai, S. L. Ma, Z. Z. Yang, D. Y. Xu, Y. Y. Sun, Q. W. Zhang (Beijing, China)
Determination of trace elements in Wuxi fallen ice by INAA 345

G. E. Miller (Irvine, California, USA)
Neutron activation analysis of core and drill cutting samples from geothermal well drilling 351

K. S. Park, N. B. Kim, Y. S. Kim, K. Y. Lee (Seoul, Korea)
Fast neutron activation analysis of rare-earth elements in monazite from Korea 359

C. Shenberg, Y. Nir-El, Z. Alfassi, Y. Shiloni (Yavne, Beer-Sheva and Jerusalem, Israel)
Rapid and simultaneous determination of U, F, Al, Ca and V in phosphate rocks by a combination of delayed neutron and γ-ray spectrometry techniques 367

M. C. Underwood, J. S. Petler (Sunbury-on-Thames, Middlesex, England)
High resolution prompt (n, γ) spectroscopy using a down hole logging tool 379

T. G. Williamson, P. E. Benneche, B. Hosticka, J. S. Brenizer, T. L. Nguyen (Charlottesville, VA, USA)
Characterization of an epithermal irradiation facility 387

Archaeology

R. G. V. Hancock, P. P. Betancourt (Toronto, Ontario, Canada and Philadelphia, PA, USA)
INAA of Minoan ceramics from Kommos, Crete 393

P. Hölttä, R. J. Rosenberg (Espoo, Finland)
Determination of the elemental composition of copper and bronze objects by neutron activation analysis 403

Definitions and Terms 409
